This JCR notes that:

- There are (at least) 50 plastic bottles used in hall per day.
- This is an unnecessary waste of plastic.

This JCR believes that

- Worcester college stands for green living and should agree aim to be as environmentally friendly as possible.

This JCR resolves to

- Remove plastic bottles from hall meal places, instead encouraging students to bring their own water bottles.
- Alternatively, glasses and water jugs could be provided on each table.
- However, if this is not COVID secure, plastic bottled water could become an 'on demand' service, where you specifically have to request to have one.
